The following is an examiner's statement of reasons for allowance:

Warrick et al. (US 5857247) and Hollins (US 3255502) are the closest art of record .

Warrick et al. teaches a buckle structure with an actuating member 36 movably connected to the frame and holding the latch 25 in a the locked position and in a second position the actuating member releases the latch thereby allowing the latch to move to the unlocked position. Hollins teaches buckle structure with a dual action lever arm 64 pivotally connected to the latch 54.

As to claim 1, Warrick et al. lacks "a lever arm pivotally held ... or a rearward direction" (lines 11-25). While Hollins broadly teaches a dual action lever arm it lacks the detailed design and resulting function of the combination structure recited in the quoted limitation. Therefore, the art of record doesn't teach or suggest the combination structure recited in claim 1.

In regard to claims 5 and 16, claim 5 has been amended solely for clarification purposes and the substance of claim 5 remains of unchanged scope. Therefore, the reasons for allowance given in the communication mailed April 6, 2007 for claims 5 and 16 are still valid and are incorporated herein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James R. Brittain whose telephone number is (571) 272-7065. The examiner can normally be reached on M-F 5:30-2:00.
